DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21,38, and 39, drawn to a method for removing non-condensing gas from a mixture of condensing and non-condensing gases, and condenser thereof.

Group II, claim(s) 22-26 and 40, drawn to a process of pumping coolant through an array of parallel heat exchangers and a condenser comprising an array of parallel heat exchanger conduits.

Group III, claim(s) 27-31 and 41, drawn to a method for minimizing the pressure within a containment vessel and containment vessel thereof..

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the group I claims are directed to a location of gas withdraw from a condenser, and are not required in the group II or group III claims, therefore the claims do not relate to a single general inventive concept..

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1797

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
